Bling In A Bottle

This is so very Donald Trump, so why didn't he think of it? The one of its kind Diva Vodka, launched in London in December last year, definitely personifies bling bling in a bottle.

A wheat-based vodka that is triple-distilled and first filtered through Nordic birch charcoal and then distilled again through precious gems such as diamonds, emeralds and rubies for extra purity, the Diva bottle also contains a glass tube filled with crystals that can be used as garnish. The 48 crystals in each bottle include cubic zirconia, smoky

topaz, pink tourmaline, amethyst, citrine and peridot. The owner of each bottle can request for a favourite coloured stone to be placed at the bottom of the column (all orders will be sent to London) so there will be no mistaking which Diva belongs to whom! And for people who want to really flaunt it, Diva can also fill the tube with precious gems. At a price, of course. *Diva Vodka (price as yet unavailable) from Bottles & Bottles, 131 Tanglin Road, Tudor Court, Tel: 6735 5163*
